

# Mass Mail Software

*Enjoy Email Marketing*

*Grow your Business with RoboMail*

**S**tandout from Junk Mail. Personalized your emails and show your respects to the recipients, such as add the salutation and recipient's name to the mail.

#### RoboMail Ultimate Functions

- Built-in SMTP email server
- Support HTML/Text email
- Support multiple attachments
- Adjustable sending speed
- Batch import email list from Excel

Use **RoboMail** software to generate and send personalized email. You can use zero-cost to promote your company/ products, reach the worldwide market and explore business opportunities. Junk mail is very popular today. Its standard content cannot draw the recipients' attention and recipients only delete the email. Your promotion message can reach the client only if the email is read. To increase the chance of reading the emails, you need to add the recipient's info and make it personalized.

Generate personalized email with **RoboMail** is simple. In the email template, you can add different variables. These variables include recipient name, address, company information and ten others user-defined fields. Those variables in email will be merged with address book when email is sending out.

Get **RoboMail** now and start your Email Marketing
